

# HardiColor™ Washroom Partitions

Performance in the toughest wet area environments

# HardiColor™ Washroom Partitions

## Build Your Reputation On Ours

For more than 20 years, impact - resistant HardiColor™ Washroom Partitions have demonstrated their ability to withstand water, detergents and vandalism in a range of high traffic applications, including:

- Shopping centres
- Office building
- Factories
- Sports and entertainment venues
- Hotels, clubs and restaurants
- Educational and institutional buildings
- Road houses and caravan parks

That's because they are manufactured using proven water-resistant HardiPanel Compressed sheets, finished with a hardwearing polyurethane coating in the colour of your choice.

## Modular Components

HardiColor™ Washroom Partitions offer a range of standard - size.

- Toilet or shower walls, doors and frontals as well as:
- HardiColor aluminium extrusion to join sheets; and
- Door hardware in heavy - duty chrome - plated brass or stainless steel.

Non - standard sizes or components can be made to order.

## Constructed To Last

HardiColor™ Washroom Partitions are constructed from extremely dense, robust, moisture and impact-resistant 18mm HardiPanel Compressed Sheet which will not warp, swell or split when exposed to water. Starting with HardiPanel Compressed Sheets ensures HardiColor Washroom Partitions will satisfy your client's performance and maintenance requirements.

## Choice of colours & Finishes

Finishing with a hardwearing polyurethane coating lets you be creative with the appearance of HardiColor Washroom Partitions.

Doors, wall panels and frontals can be finished in a wide range of decorator colours to complement the exterior design of any project.

Panels and doors can be coloured differently to create contrast, or matched for a more harmonious effect.

Additional textured finishes can be supplied in some states and the HardiColor aluminium extrusion can be coloured to match the panels. For more information on these options contact the HH supply&Tech Services Co., Ltd. Tel: 08 3838 2546.

## On - Site Touch - Up

HardiColor™ Washroom Partitions are extremely hardwearing. The combination of touch fibre cement sheet with a hardwearing polyurethane coating resists most damage. If necessary, however, small touch - up jobs can be carried out on site. Alternatively, panels can be removed and re-finished in the factory, ready to be reinstalled.

## Fast Installation

All HardiColor™ Washroom Partition components are pre - finished and supplied with the necessary hardware, ready for quick and easy installation.

HardiColor™ Washroom Partition can also be supplied in kit form for installation in remote areas.

Moisture resistant	Impact resistant	Non-combustible	Easy to clean	Termite resistant

# Specification

## Typical Specifications

These typical specifications will help you detail HardiColor™ Washroom Partitions for your project:  
Supply and install washroom partions as follows:

- Decorative finish to be HardiColor™ polyurethane system applied in colour (specify name/number) and finish (HardiColor™ Satin\* /HardiColor™ Stipple\* / alternative\* )
- Divider panels to be 18 mm HardiPanel™ Compressed (two piece) factory fabricated and secured to the back wall and HardiPanel™ Compressed frontal panels using aluminium channels.
- Frontal panels to be 18 mm HardiPanel™ Compressed factory - finished to match/contrast (select one) dividers, and installed with overhead channels. Frontals to be fixed to the floor using one of the following methods:
  1. Base channel,
  2. 6 mm brass dowels, or
  3. Pedestals.

- Head rail over doors to be finished with insert trim.
- Wall nib/s to be secured to side wall/s with aluminium channel.
- Where sheets are supplied unpainted, all exposed edges on frontals and nibs to be neatly arrised before painting.
- Cubicle doors to be either:
  - 18mm HardiPanel™ Compressed Sheet, or
  - 18mm highly moisture - resistant medium - density fibreboard (HMR MDF), coated on all surfaces ang edges to match/contrast (select one) dividers and/or frontals.

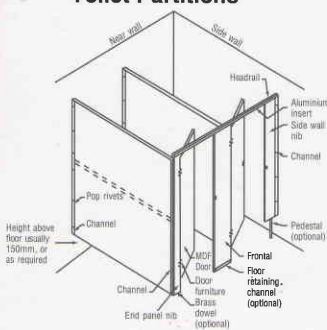

**Note: Due to its superior durability, James Hardie recommends the use of HardiPanel Compressed Sheet for cubicle doors in areas subject to prequent moisture.**

- Door hardware, consisting of two bolt - through hinges (lift - off gravity or spring - loaded), one slotted indicator, one bolt and staple, one coat hook bumper, to be installed to hardware manufacturer's instructions.
